

Tailor made for customers - new product qualities

Starke & Sohn GmbH optimizes the production of naphthenic base oils and provides a new product range:
StaSo Grundöle MSR.

Premium
StaSo Grundöl MSR 10/40

Standard
StaSo Grundöl 10/40

StaSo Grundöle MSR are based on naphthenic raw materials, produced by Starke's MSR-technology (**Multiple-Selective-Refining**). Through innovative process control and an optimized level of refining **StaSo Grundöle MSR** are almost produced in a colourless and odourless premium quality, meeting highest demands regarding the properties of naphthenic, low-viscosity base oils.

StaSo Grundöle MSR are currently available in the viscosity grades 8/40, 10/40 & 12/40 and can be preferably used in the chemical and lubricant industry for the production of chemical intermediates, additives, metalworking products and release agents.

For interested users technical data sheets, material safety data sheets and further information are of course available.
